"Are you looking for a true leader? Are you seeking for a people oriented manager that never loses sight of business objectives? I have worked with Consuella for almost 5 years now and I can guarantee she is the perfect impersonation of that description. Why? It might be because of her high quality background and education, or because of her great sense of self awareness and self development, or even because of her exemplar attitude towards peers and collaborators. I would strongly recommend Consuella for any high demanding, creative or "in need of a responsible person" position. It almost strikes me how much respect

her personality imposes, being friendly and warm in the same time and how much her imaginative side has to offer, being able in the same time to manage intricate operations aspects in a natural manner. She is great in solving any operations problem, she is flexible and calm, great listener and an even better speaker, her conflict management skills are outstanding while dedicated, upfront and assertive."

"Consuella was my manager when I first joined PSS and we worked together on a daily basis. During that time, she proved to be incredibly helpful and knowledgeable with an extraordinary capacity to motivate people and make them feel important. She always had an efficient strategy lined up to make our work go smoothly and was excellent in communicating her ideas to the rest of the team. I learned from her even when she wasn't training me. She is that type of priceless manager that benefits of a great mix between strong leadership skills and gut feeling. Needless to say, she is customer and results oriented person, dedicated, supportive, analytical and I most value her integrity and empathy. I will never forget when she "invented" practically from scratch a mechanism to measure the teams performance based on our inputs and made sure we all contributed to the task. It was practically a team building on the spot that made us all realize how important each of the team players is. She is not only an extraordinary manager, but also an extraordinary person and I can only say that I would be extremely happy to work with her again."

— **Ana Maria Vlad**, reported to Consuella at PSS

"Versatile manager with excellent interpersonal skills, result-focused mind, determined. Able to conform to tight dead-lines and work independently at the same time to achieve maximum results within proposed time-frame. Strategic thinker while driven by the desire to explore new development of the business. Able to adapt quickly to unforeseen situations she has been able to obtain the time and cost-effective solutions. Consuella excels through ambition and dedication to the job, unlike the standard motivation for most managers or business partners to improve their financial income or boost up a company that they don't feel they belong to."
